# Stage Plot

## Monitors and Front of House (FoH)

## Monitors

Performers will manage their own monitor mix via the 12U IEM Rack. They will be using 2 Sure receivers with 4 Shure monitor packs. If there is house monitoring as well, we will need to dial those in for each member as a backup.

### Font of House ( FoH )

If the house has a sound system that we need to utilize, a dry signal will be provided to FoH via a labeled 30 foot 16 channel snake.
